INTERNATIONAL GEARING CONFERENCE TO BE HELD IN GREAT BRITAIN

An International Gearing Conference will be held in Newcastle upon Tyne, Great Britain, from 7th to 9th September 1994.

The organizers of the Conference are the British Gearing Association, the National Metrology Laboratory and the University of Newcastle upon Tyne. It is sponsored by a number of organizations, among them foreign ones, like EUROTRANS – an important international organization joining the European manufacturers of transmissions and transmissions elements.

The major themes of the Conference are: researches, design, components, materials, manufacture, industrial practice.

A technical exhibition of gearings, production equipment and software will be held during the days of the Conference.

The dead line for application forms for paper presentation is 31st July 1993, and the dead line for presentation of the paper manuscripts is 1st June 1994.
